

Student Health Information – Database Documentation

Entity

Student Health Information

The Student Health Information entity represents health-related data associated with students, including immunizations, health requirements, medical compliance records, and other health indicators required for enrollment or participation in institutional activities. This entity supports compliance tracking, student eligibility verification, and institutional health reporting requirements.

Related Entities

The Student Health Information entity is related to the following business entities:

- **Students**
Health records are associated with individual students.
 - **Person**
Student identity data originates from person records.
 - **Holds**
Health compliance issues may result in administrative holds.
 - **Sessions/Terms**
Health requirements may be enforced by academic period.
 - **Student Activities**
Certain activities may require health clearance.
-

Key Tables

ST_HEALTH_MASTER

Table Description

The ST_HEALTH_MASTER table stores health records associated with students. Each record represents a health-related entry such as an immunization record, compliance requirement, or other medical documentation associated with a student.

Key Columns

Student Identification

- **ID_NUM**
Student identifier (foreign key to identity records).
 - **APPID**
Unique identifier for the health record.
-

Health Record Identification

- **HEALTH_CDE**
Code identifying the type of health record.
 - **HEALTH_DESC**
Description of the health requirement or record.
-

Compliance Tracking

- **COMPLIANCE_STATUS**
Indicates compliance with the health requirement.

Key Column Values (COMPLIANCE_STATUS)

- **C** – Compliant
 - **N** – Not compliant
 - **P** – Pending
-

Health Record Dates

- **RECORD_DATE**
Date the health record was recorded.
 - **EXPIRATION_DATE**
Expiration date of the requirement if applicable.
-

Other Important Columns

- **COMMENTS**
Notes related to the health record.
 - **ENTERED_BY**
User who entered the record.
 - **ENTERED_DATE**
Date the record was entered.
-

Relationships to Other Tables

- **PERSON**
Links health records to student identity.
 - **HEALTH_TYPE_DEF**
Provides definitions of health record types.
 - **TABLE_DETAIL**
Provides descriptions for coded values.
-

HEALTH_TYPE_DEF

Table Description

The HEALTH_TYPE_DEF table defines valid categories of student health records and requirements.

Key Columns

- **HEALTH_CDE**
Health record type code.
- **HEALTH_DESC**
Description of the health requirement.
- **ACTIVE_FLAG**
Indicates whether the health requirement type is active.

Key Column Values (ACTIVE_FLAG)

- **Y** – Active
- **N** – Inactive

Relationships to Other Tables

- **ST_HEALTH_MASTER**
Provides health requirement classifications.
